RE: Craig Y Nos Sewer Project

Dear Resident of Craig Y Nos:

You should have recently received a letter from Carroll Engineering Corporation, dated December 12, 2023, regarding the Craig Y Nos sewer project. The purpose of that letter is to notify households within the project area of surveyors coming to examine properties and measure distances from houses to potential proposed sewer lines. We are doing this to minimize the cost and effort of individual properties connecting themselves to the sewer line that is being mandated by DEP to be completed by the Fall of 2025.

We plan to have a special meeting dedicated to the Craig Y Nos sewer project in Spring 2024. The meeting will provide a project timeline update, answer any questions about the analysis being undertaken, and to address the financial components of the project. Your cooperation in allowing the surveyors to examine your property will shorten the project timeline, lower the overall cost, and provide DEP with the necessary verification that this project is moving forward.

We will continue to communicate directly with all of you regarding the upcoming special meeting, date TBD, and any other project updates as we receive them.

If you did not receive the letter from Carroll Engineering Corporation, please contact our office and we will forward you a copy.

Sincerely,

Kurt M. Ferguson  
Township Manager
